

The Robins In Your Backyard

By Nancy Carol Willis

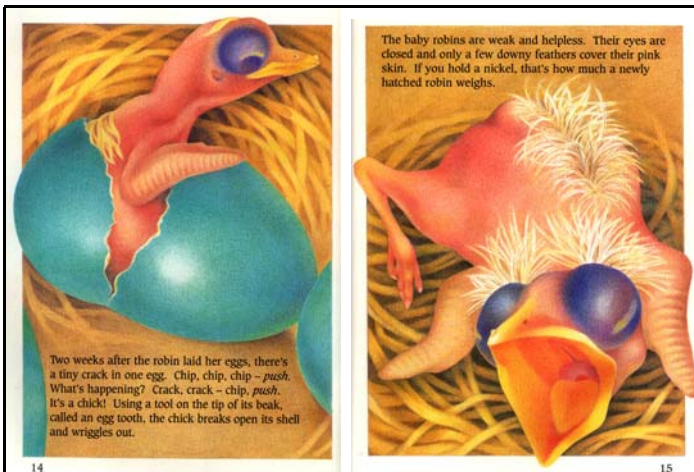

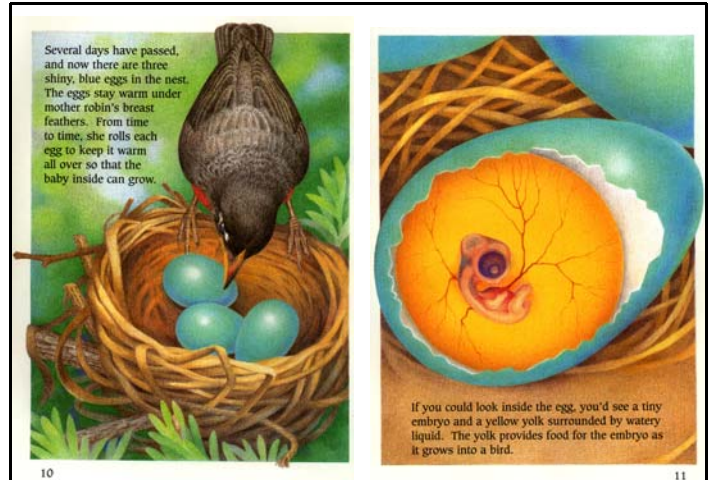

\$15.95 Hardcover ISBN 0-9662761-0-8, \$6.99 Paperback ISBN 0-9662761-1-6, 32-pages, Children 4-8

Teachers and Librarians

“Beautifully detailed large-size pencil drawings accompany a clear explanation of the breeding habits of the American robin. Teachers and parents will find it an unusually clear and enticing production.”

The Midwest Children’s Book Review

“The natural progression of the Robin’s life cycle provides the book with its easy, well-organized flow. This book could well be used in an early elementary school classroom.” *Small Press Magazine*

Zoos, Museums and Specialty Stores

“Solid facts about the mating, nesting, and migration habits of the American robin are neatly presented with big, eye-catching illustrations.” *Booklist*

“Bird lovers and other curious folk will enjoy this light, but accurate account of the life cycle of the robin.” *School Library Journal*

“A gift for any child who has enjoyed watching robins.” *Reviews from Parent Council*

Parents and Rehabilitators

“Concluding information on dealing with injured or orphaned birds completes the attractive life cycle of the familiar bird.”

The Elementary School Library Collection

“As a specially trained wildlife aide, Nancy faithfully donated hundreds of hours to care for injured, orphaned and oiled birds. And it is lucky for us that her artistic and storytelling abilities transform this special understanding to something we all can share.” *Lynne Frink, Founder*
